Response to Amendment

Claims 21 – 43 are now pending based upon the pre-amendment filed 2/5/04.

Response to Arguments

Applicant's arguments filed 6/2/05, with respect to the preliminary amendment filed 2/5/04 have been fully considered and are persuasive. The previous rejection addressing the wrong set of claims has been withdrawn.

Claim Objections

Claim 42 is objected to because of the following informalities: under MPEP, §608.01(m) the claim must end with a period. See See Fressola v. Manbeck, 36 USPQ2d 1211 (D.D.C. 1995). Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Application/Control Number: 10/085,791

Art Unit: 3661

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21 – 20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 17 at least of U.S. Patent No. 6,697,719 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the Patent encompasses all of the limitations (the "detachable" feature set being for detachably coupling to the interface; the Internet provides for the remote access/programming; the set module containing stored codes; using a cell phone for the RF transceiving aspect, etc.) of the present claimed invention and would have been obvious to one of ordinary skill in the art at the time of the invention and because the same end result of providing a variety of functions to a user of a vehicle using a programmable electronic device.

Application/Control Number: 10/085,791

Art Unit: 3661

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yonel Beaulieu whose telephone number is (703) 305-4072. The examiner can normally be reached on M-R, from 0900-1600.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas BLACK can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
